**RE: Universal Service Contribution Methodology; Universal Service  
Administrative Company Request for Guidance, WC Docket No. 06-122**

Dear Ms. Dortch:

On August 14, 2012, Chris Miller and the undersigned of Verizon met with Christine Kurth, Legal Advisor to Commissioner McDowell, regarding the above-captioned proceeding.

In the meeting, we discussed the Joint Petition of AT&T, CenturyLink, SureWest, and Verizon for Clarification or in the Alternative for Partial Reconsideration<sup>1</sup> of the *TelePacific Order*.<sup>2</sup> We urged the Commission to make clear that wholesale providers cannot be forced to make Universal Service Fund (USF) contributions on behalf of carrier-customers in situations where they in fact obtain a reseller certification from those customers. In particular, the Commission should make clear that wholesale providers that complied with the directions in the Form 499 Worksheet Instructions cannot be made to restate their revenues and make additional contributions to the fund if it later turns out that a reseller, for whatever reason, either should not have signed a certification or should have submitted a modified certification.

We also discussed proposals to change the reseller exemption process to require resellers to apportion facilities or services purchased from wholesale providers between services resold as telecommunications and those resold as information services. We explained that there is no existing Commission rule that prohibits a customer from accurately certifying on an entity basis that it is a reseller. In fact, the Commission's recent Notice of Proposed Rulemaking (NPRM) in

Page 2

this docket seeks comment on whether the Commission should adopt, for the first time, a rule that requires resellers to apportion their wholesale purchases in some fashion.<sup>3</sup>

We explained further that any requirement for resellers to apportion their wholesale purchases would require costly and time-consuming changes to ordering, billing, and reporting systems, and would increase carriers' burden of administering the contribution system. Because of those burdens, commenters on the recent NPRM uniformly opposed an apportionment approach and also observed that any new apportionment requirement would take a significant amount of time for both wholesale providers and reseller customers to implement. At a minimum, if the Commission elects to move forward with an apportionment requirement it should afford companies sufficient time to make these complicated process changes. The Commission should also issue clear guidance establishing uniform expectations for both wholesalers and resellers navigating the USF exemption process.

This letter is being filed electronically pursuant to Section 1.1206 of the Commission's rules. Please contact me if you have any questions.

Sincerely,

A handwritten signature in black ink that reads "Maggi McCreedy". The signature is written in a cursive, flowing style.

cc: Christine Kurth (via e-mail)
